**This is a draft syllabus. Please see your course OWL site for the final syllabus.**

**Course delivery with respect to the COVID-19 pandemic**

The intent is for this course to be delivered in-person but should the COVID-19 landscape shift, the course will be delivered on-line synchronously (ie., on Zoom at the times indicated in the timetable) / asynchronously (eg., posted on OWL for students to view at their convenience). The grading scheme will not change. The course will return to an in-person mode of delivery when the University and local health authorities deem it safe to do so.

**Course Description:**

A thematic introduction to 21st-century history focused on phenomena that characterize our age: the global connectivity of supply chains, planetary-scale computation, the War on Terror, and unprecedented ecological change. Contemporary events are contextualized in an interdisciplinary fashion at time scales ranging from days to millions of years.

***Prerequisite(s):***

Any 0.5 or 1.0 Essay course.

Unless you have either the prerequisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. The decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

**Course Syllabus:**

***Expected Preparation***

You will be given a short collection of readings to do before each scheduled meeting. It is crucial that you take this requirement seriously and read the materials carefully. Since teamwork is an essential component of this class (and your grade), students who are not prepared for class will not only be letting themselves down, but some of their classmates, too.

### ***Participation and Professionalism***

You are required to participate in each scheduled meeting. *Failure to participate in more than two meetings without prior approval or a note from your academic counsellor will result in a failing grade.* Since you will be working closely with others using teleconferencing and shared online documents as well as in person, it is important to be respectful, to share your own ideas and to listen carefully to the ideas of others.

### ***Teamwork and Peer Evaluation***

Each scheduled meeting you will be randomly assigned to a team of about 7 people for that day's activities. Grades for team activities will be shared by all members of the team. At the end of each team activity you will submit a very brief peer evaluation for the members of your team. I will use these assessments, in conjunction with my own, to determine your individual contribution to team assignments.

### ***Learning Outcomes***

At the conclusion of this course students will be able to

- Recognize and analyze agency problems, transaction costs, network effects, nonlinearity and complexity in the historical development of contemporary events and processes
- Situate aspects of the present moment with respect to historical explanations from a range of specialist literatures
- Navigate a variety of contemporary sources
- Use computational tools that allow small teams to collaborate in the analysis of digital sources

### **Course Materials:**

All course materials will be provided electronically on OWL.

You will also be required to use software provided by the university:

- To participate in class and team meetings you will need to install and log in to Zoom <https://wts.uwo.ca/zoom/index.html>

- You will need access to Microsoft Office tools (especially Word, PowerPoint and Excel). These are available through your Office 365 account  
[https://wts.uwo.ca/office\\_365/index.html](https://wts.uwo.ca/office_365/index.html)
- Class sessions and graded assignments will also require teamwork that will be conducted through MS Teams  
[https://wts.uwo.ca/microsoft\\_teams/index.html](https://wts.uwo.ca/microsoft_teams/index.html)

### Methods of Evaluation:

Students must submit all course assignments in order to pass the course.

<i>Assignment</i>	<i>Worth</i>	<i>Handed Out</i>	<i>Due Date</i>	<i>Zero Date</i>
01. Virtual International Classroom (online collaboration)	20%	Week 02	Week 03	Week 04
02. Black Box Society (algorithmic bias)	20%	Week 04	Week 05	Week 06
03. Global Supply Chains (networks)	20%	Week 06	Week 07	Week 08
04. Anthropocene (geospatial analysis)	20%	Week 08	Week 09	Week 10
05. After Now (simulation)	20%	Week 10	Week 11	Week 12

Each assignment has a suggested due date and, a week later, a zero date. If you hand in your assignment before the zero date, you will receive full credit for your work. After the zero date, it will be worth nothing.

If you are unable to meet a course requirement due to illness or other serious circumstances, you must provide valid medical or other supporting documentation to Academic Counseling as soon as possible.
